- Management
  - Implemented new RFC system
  - Implemented new ownership model
  - Thought Leadership through Anduril's internal Platform Blog (e.g. released "Platforms vs. Algorithms" piece)
- Mission Autonomy Architecture

- APIs
- Backend Services
- Sensor Infrastructure Architecture
- C++ Infrastructure Architecture
  - Application Infrastructure
  - Core Libraries
  - Build Infrastructure
- Networking/Data Systems Backend
  - Bandwidth Efficient Pub/Sub
- Systems Software Hardware Images
  - Sentry Tower, Ghost, Dust
- Perception
  - Mapping
  - Object Detection
  - Quantized Learning and Inference

### University of Wisconsin-Madison

Irvine, CA September 2016 — May 2019

Research Assistant

- Machine Learning and Computer Vision Research under Dr. Vikas Singh
  - Research topics included Novel Activation Functions, Semi-Supervised Learning, Computer Vision, Semantic Segmentation, Data-Dependent Regularizers, Drones
  - Industrial Collaboration with American Family Insurance targeting automated insurance claim verification
- Big Data Systems Research under Dr. Shivaram Venkataraman
  - Research topics included machine learning, data loading, cluster scheduling
  - Industrial collaboration with Microsoft Research
- Robotics and HCI Research under Dr. Bilge Mutl
  - Research focus on Collaborative Industrial Robots
  - In collaboration with MIT CSAIL
- IoT Research at the IoT Lab focusing on Computer Vision and Smart Homes

Facebook, Inc.

Menlo Park, CA

May 2018 — August 2018

Software Engineer Intern

- News Feed Integrity Team
- Broad Trust: built data models and analytics dashboards for i8n launch
- $\bullet$  Common Ground and Polarization: built new ranking algorithm based on an unsupervised model, ran experiment on 1% of Facebook's users
- Article Context: built article-to-context mapping system with 99% precision and 99% recall
- Received full-time return offer

#### Stanford University

Research Intern

Stanford, CA June 2017 — September 2017

• Multi-Robot Interaction project under Dr. Wendy Ju

• Daemo, a crowdsourcing platform, under Dr. Michael Bernstein

#### Startup at Top Business School

Product Manager Intern

May 2016 — August 2016

- Market research, pricing analysis, competitive analysis
- UX research, helped identify improvements to reduce attrition by 15%

#### Projects

Simulation Platform Infrastructure Simulation platform infrastructure for robots, Kubernetes for container orchestration, GoLang for backend systems, Python for scripting

Command-And-Control Framework A framework for writing command-and-control applications, implemented using Protocol Buffers

Efficient Pub-Sub on Mesh Network Bandwidth-efficient distributed publish-subscribe system implemented in GoLang

C++ Polyrepo with Nix A novel polyrepo architecture for C++ projects using Nix

Mission Autonomy System Ground-breaking complex distributed system for robots implemented in C++ and GoLang

Space Sensor Network Simulated space sensor network for tracking satellites, backend using GoLang, sensor simulation using Python

**Drone Mapping System** Generating 2D maps from overhead imagery extracted from a drone, backend systems using GoLang

Drone Object Detection System Detecting objects on a drone, Nvidia Tegra and TensorRT Quantized Inference Quantized learning and inference for low-power edge devices, models trained in PyTorch and TensorFlow, Google Edge TPU for inference

OneAccess Data loading system for machine learning implemented with Python

Learning with Hermite Polynomials Demonstrating superior semi-supervised learning with Hermite Polynomials, models trained using PyTorch

Data-Dependent Regularizers Learning semantic segmentation with data-dependent regularizers, models trained using PyTorch, built custom optimizer for novel iterative gradient algorithm Conditional Drones Generating training data for drone vision models using conditional generative adversarial networks, dataset generated using Python and Unreal Engine, models trained using PyTorch Diabetic Retinopathy Detection Detecting diabetic retinopathy using K-Nearest Neighbors, Logistic Regression, LeNet, GoogLeNet, models trained using Python and TensorFlow

View-Invariant Semantic Segmentation Learning view-invariant semantic segmentation for UAVs, dataset generation using Python and Unreal Engine, model training and inference using TensorFlow

Programming Languages C++, GoLang, Python, Nix, Java, JavaScript, Bash Domain Expertise Backend Product, Backend Systems, Robotics, Big Data Systems, Machine Learning, Computer Vision, C++ Infrastructure, Cloud Deployment, CI/CD Technologies PyTorch, Docker, Kubernetes, TensorFlow, CircleCI, Git/GitHub, Linux

Business Technical Leadership, Entrepreneurship, Backend Product Management, Technical Writing, Sprint Management, Technical Execution, Computer Science Research
